2026-2028 Community Impact Grant Questions

Week of January 12 – 15, 2026

No formal questions.

Week of January 16 – 22, 2026

Q. Under the primary pillars, I want to confirm how you are counting the data point "# nights provided with safe shelter." Is that beds per night times the number of nights? My understanding is, for example, if 10 people sleep in our shelter each night over the course of a year, the number would be 3650. Is that correct/does that make sense?

A. Yes, your calculations for bed nights are correct.

Q. Also under primary pillars, I see the question "What tools/mechanisms will you be using to measure your demographics, outputs, and outcomes?" but I don't see a field to enter that answer. Is that question just for reflection, or am I missing the place to put our response?

A. If you click the Edit button, it should open the text box for you to write your answer.

Q. Would an initiative that primarily addresses child safety that reduces mortality rates meet the priorities within this funding opportunity?

A. UWDAT's overarching goal is to prevent/reduce poverty. If you believe that a child safety initiative that reduces mortality rate would also impact poverty, then yes it would meet the priorities. You would also need to find 3 outcomes and 1 output that fits with your program that could be reported on. I encourage you to review the outcomes and outputs on the application/community investment plan to see if any were in line with your perspective project.

Week of January 23 – 29, 2026

Week of January 30 – February 5, 2026

Week of February 6 – 12, 2026
